## # ASX Desktop OS

Guest desktop experience for **\*\*alisonscorpion.com\*\*** – thin universe-purple glass windows, Three.js background, product app = **\*\*Containers\*\*** (`../staging/`).

**\*\*Three.js documentation:\*\*** [threejs.md](../threejs.md) · full website map:  
[../docs/THREEJS\_WEBSITE.md](../docs/THREEJS\_WEBSITE.md)

## ## Local preview

```
```bash
cd /home/alice/alisonscorpion/website
python3 -m http.server 8765 --bind 127.0.0.1
# → http://127.0.0.1:8765/desktop-os/
```
```

## ## Apps

Terminal, Files (PCManFM-Qt style), Browser (+ blocklist + ASX see-strip), Chat, Containers, honeybee, Calculator, Notepad, Stickies, Spreadsheet, Mind Map, Image/PDF/Video viewers, About, Settings.

## ## Backup

Containers snapshot: `../website-backup-containers-20260810_061303Z` (sibling of `website/` under monorepo root).

## ## Security notes (OCodex 2026-08-10)

- Calculator uses a safe arithmetic parser (no `eval`` / `Function``).
- Browser blocklist is **\*\*soft/client\*\*** policy; label in UI.
- Three.js from cdnjs without SRI pin – pin integrity when locking production version.
- Guest FS is virtual only.

=====

# Three.js – ASX Desktop OS

**\*\*Parent doc:\*\*** [ `../docs/THREEJS\_WEBSITE.md` ] ( `../docs/THREEJS\_WEBSITE.md` )

**\*\*Module:\*\*** `js/three-bg.js`

**\*\*CDN:\*\*** three.js **\*\*r128\*\*** `three.min.js` (cdnjs) → global `THREE`

## What it does

Renders a full-viewport **\*\*universe purple\*\*** WebGL background under the desktop chrome:

- Void clear + fog ( `#0a0809` )
- Icosahedron core + wireframe shell
- Three torus rings
- Starfield (points)
- Purple + gold point lights
- Continuous rotation animation; resize-safe

## Integration

1. `index.html` – `- 2. `main.js` – after boot splash: `initThreeBg("three-bg")`
- 3. CSS – `#three-bg { position: fixed; inset: 0; z-index: 0; pointer-events: none; }`

## Design sources

Claude HTML extracts (not shipped as entry):

- `brainstorm/claude\_html\_extracts/extract\_00.html` – gate / core / rings
- `brainstorm/claude\_html\_extracts/extract\_03.html` – entrance / boot

## Not this module

- **\*\*Construct recipe\*\*** 3D scenes → `src/lib/construct/recipes/threejsrecipe.js` (Containers product)
- Window manager / apps → DOM, not Three.js

## Security / ops

- Soft dependency: if `THREE` missing, `initThreeBg` returns `null` (desktop still usable without WebGL).
- Prefer pin SRI when locking production CDN version.
- Optimization: `devicePixelRatio` capped at 2.

## Preview

```
```bash
cd website && python3 -m http.server 8765 --bind 127.0.0.1
# http://127.0.0.1:8765/desktop-os/
```
```
